All samples subject to ICP 1 Analysis by SRC in Saskatoon, SK. ICP1 results >1000 ppm Uranium subject to SRC U308 Assay

ICP1 results for Ag, Mo and Cu, are reported by SRC in parts per million (ppm). 1 ppm = 1gm/t, 10000 ppm = 1%

* Intervals reported down-hole. Estimated true widths for the Lac Cinquante mineralized zone average approximately 80% of the drilled interval width: reported

** Full intervals include ICP U analysis in ppm converted to U308%. Conversion to U308% = ppm x 0.01179%
